

A scenic landscape featuring a sunset over mountains, a lake, and a stone fire pit in the foreground. The fire pit is lit with a fire, and there are two metal chairs nearby. The background shows a wooden fence, a lake, and rolling hills under a colorful sky.

ARE THERE BURIED PIPES IN YOUR YARD?

*Follow safety rules for buried gas lines
to your garage, shop, grill or fire pit.*

**Know what's below.
Call before you dig.**

Great Plains Natural Gas Co. operates and maintains all natural gas piping through your gas meter in accordance with federal Gas Pipeline Safety Regulations.

- ▶ Your buried gas lines downstream of (beyond) the meter are subject to the same inspection and maintenance requirements as similar company-owned lines.

That is, they must be monitored for corrosion and leakage.

If unsafe conditions are found, buried lines must be repaired or disconnected.

- ▶ When you excavate, you must call a professional to locate the line in advance. ***The excavation around the piping must be done by hand.***
- ▶ Plumbing and heating contractors in your area can provide locating, inspecting, new installation and repair services on your downstream buried pipes.
